

AFFIDAVIT OF SERVICE

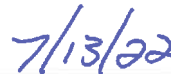

Under the Cohasset Wetlands Regulations

I, Patrick G. Brennan, hereby certify under the pains and penalties of perjury, that on July 13, 2022, I gave notification to abutters by USPS Certificate of Mailing in compliance with Section 5.A(2) of the Cohasset Wetlands Regulations in connection with the following matter:

A Request for Determination of Applicability filed under the Massachusetts Wetlands Protection Act by Brian Joyce, P.E., Cohasset Director of Public Works, with the Cohasset Conservation Commission on July 11 2022, for work in Beechwood Street between Bound Brook Lane and King Street, Cohasset, MA.

The form of the notification, and a list of the abutters to whom it was given and their addresses, are attached to this Affidavit of Service.

**NOTIFICATION TO
ABUTTERS**

In compliance with the Town of Cohasset Wetlands Regulations, Section 5.A(2), you are hereby notified of a filing of a Request for Determination of Applicability with the Cohasset Conservation Commission for the Beechwood Street Water Main Replacement project, located along Beechwood Street from Bound Brook Lane to King Street subject to protection under the Massachusetts Wetlands Protection Act and the Cohasset Wetlands Protection Bylaw, Chapter 260.

Applicant: Town of Cohasset Department of Public Works
41 Highland Avenue
Cohasset, MA 02025
781-838-4100, ext. 5120, Brian Joyce, Director

Project: Beechwood Street Water Main Replacement

Location: Beechwood Street between Bound Brook Lane and King Street

Engineer: Amory Engineers, P.C.
PO Box 1768, 25 Depot Street
Duxbury, MA 02331
781-934-1768, Patrick G. Brennan, P.E.

The public hearing is scheduled for **Thursday, July 28 at 6:30 PM** via Zoom. The hearing may also be offered in person in addition to Zoom. Please check the Town of Cohasset website for additional information related to how to attend/log into the hearing.

A description of work is on the back of this notice. Comments may be provided in writing or at the public hearing.

Beechwood Street Water Main Replacement Description of Work

The existing 10-inch cast iron water main in Beechwood Street has reached the end of its useful life and needs to be replaced. Due to the presence of ledge, the new water main will be installed in the same trench as the existing water main. The work includes installation of temporary by-pass water main along the sides of Beechwood Street, excavation and removal of approximately 1,910 linear feet of the existing 10-inch cast iron water main and installation, in the same trench, of 12-inch ductile iron water main from King Street to Bound Brook Lane. Water main installation will include pipe, fittings, valves, hydrants and new house service lines from the main to the curb stop at the property line. Trenches will be backfilled as work progresses and will be repaved as required. All work, except hydrant and service line installation, will be within existing paved areas. Hydrants and service lines will be installed in the same locations as existing hydrants and service lines and all work outside of the pavement would be within five to ten feet of the existing pavement. Work is within the buffer zone only, no work is proposed in wetland resource areas. A filter sock erosion control barrier will be installed along the edges of the road where wetlands are present (shown on the plans). There will be no change in impervious area or drainage patterns as a result of the work.

310 CMR 10.02 (2)(a)2 states that *“activities conducted to maintain, repair or replace, but not substantially change or enlarge an existing and lawfully located structure or facility used in the service of the public and used to provide electric, gas, water, sewer, telephone, telegraph and other communication services, provided said work utilizes the best practical measures to avoid or minimize impacts to wetland resource areas outside the footprint of said structure or facility. A project proponent claiming that work to remove, fill, dredge or alter an area specified in 310 CMR 10.02(1) does not require the filing of a Notice of Intent has the burden of establishing that the work is not subject to Regulation under M.G.L. c. 131 § 40.”* The work is essentially replacing the water main in kind. Additionally, water main replacement is listed as a limited project in 310 CMR 10.53 (3)(d) and the maintenance of a utility line (in this case replacement) is also exempt from the requirements of the Riverfront Area as noted in 310 CMR 10.58 (6)(a).
